

**18<sup>th</sup> September 1985**  
**Tilberthwaite Deep Level**

First of the Wednesday evening digs to clear a way through the clay fall in Tilberthwaite Deep (or Horse) Level. 7 Members met at Tilberthwaite Gill car park and due to the fact that we didn't have any timber with us, decided to clear rubble from the floor of the level beyond the slate closehead to give an improve working height at the 'sharp end' of the dig. The rubble was dug from the R.H side of the level & piled up on the left. After 2 1/2 hours the dig was adjourned to the Crown Hotel for refreshments.
