

Cumbria Amenity Trust Mining History Society (CATMHS)

Founded 1979

Occasional Grants to other Organisations or Societies.

From time-to-time CATMHS may grant small value funds to assist others in conducting activities that support our core mission. This process is a guide to how such requests are assessed and determined within the Society.

The objects of CATMHS as a charity are stated as:

- 1) *To explore, research, maintain access to and preserve for the benefit of our cultural and industrial heritage those historic industrial and architectural remains including all forms of archival material, hand-written, printed and oral as may exist in the County of Cumbria, and elsewhere, in the form of mining and quarrying remains and related industrial workings, both above and below ground.*
- 2) *To advance the education of the public concerning the industrial history of Cumbria, and elsewhere, in particular the history of mining and quarrying, along with the associated archaeology, mineralogy and geology by publishing books or pamphlets or in any other appropriate manner to make known to the public the existence of buildings and constructions of particular historical, cultural or constructional interest, with the emphasis on mining and extractive industries.*

Application Process

All applications for funding must demonstrate clearly how the activity supports the above objects of the Society and must clearly state the amount of funding requested. Generally, only a single funding application may be made for a particular project.

Each application for funding must be supported by a CATMHS Trustee.

All applications will be considered at a meeting of the CATMHS Committee Trustees in accordance with the governing constitution. The Committee's decision will be final.

Applications must be made on the form attached. Additional material supporting the request will not be accepted.

There are at least four meetings of the Trustees per year but in exceptional cases the Trustees may be consulted electronically provided the outcome is recorded for the minutes.

CATMHS's support for the project should be acknowledged in any written reports or publications or publicity, in a form to be agreed between the parties.
